Combustible material: may burn but does not ignite readily.

## **Hazardous Combustion Products**

In a fire, product may produce the following: Carbon monoxide, Carbon dioxide, Nitrogen oxides, Ammonia. Aldehydes. Fire may produce irritating, corrosive and/or toxic gases.

## Suitable Extinguishing Media

CO2, dry chemical, dry sand, alcohol-resistant foam.

## **Unsuitable Extinguishing Media**

Do not use a direct water stream, which may spread fire.

## 6. Accidental Release Measures

## Steps To Be Taken In Case Material Is Released Or Spilled

PROCEDURE TO BE FOLLOWED IN CASE OF LEAK OR SPILL.

Absorb with sand or vermiculite and place in closed containers for disposal. Ventilate the area.

## Protective Precautions, Protective Equipment and Emergency Procedures

Wear respirator, chemical safety goggles, rubber boots, and heavy rubber gloves. Where splashing is possible, full chemically resistant protective clothing, and boots are required.

#### Protective Equipment Summary - Hazard Label Information:

Neoprene gloves Safety glasses, or goggles. Impervious clothing. Chemical resistant boots

## Respiratory Equipment (Specify Type)

Normally when good engineering controls are used, no respiratory protection is needed. However, if cured product is abraded by sanding or grinding use a NIOSH approved air-purifying respirator. Where risk assessment shows air-purifying respirators are appropriate use a dust mask type N95 (US) or type P1 (EN 143) respirator. A NIOSH/MSHA approved air purifying respirator with an organic vapor cartridge or canister may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits. Protection provided by air purifying respirators is limited. Use a positive pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air purifying respirators may not provide adequate protection.

#### **Eye Protection**

Safety glasses, or goggles.

#### **Protective Gloves**

Nitrile rubber and Neoprene are recommended.

## **Other Protective Clothing**

Where splashing is possible, full chemically resistant protective clothing, safety glasses or face shield and boots are required.

#### **Engineering Controls (Ventilation etc.)**

Good general ventilation should be sufficient to control airborne levels. Safety shower and eye bath.

#### Work/Hygienic/Maintenance Practices

Wash contaminated clothing before reuse. Discard contaminated shoes. Wash thoroughly after handling.

#### **Environmental Exposure Controls**

Avoid runoff into storm sewers and ditches which lead to waterways.
